Synthetic chemistry extraction fixture - demonstration only

Not for laboratory execution. Fictional compounds; no validated outcomes or safety assessment.

Reagent	Quantity	MW (g/mol)	Equivalents
Fictional Alpha	100 mg / 1 mmol	100	1
Fictional Beta	225 mg / 1.5 mmol	150	1.5

Step 1: Use fictional solvent S at final Alpha concentration 0.100 M. Demonstration conditions: 25 C for 1 h.

Step 2: Transfer a 10 uL sample to a final volume of 1000 uL. No quench, analysis outcome, workup, purification or safety information is established.
